

CONSTRUCTION NOTICE

Serving Californians Since 1929

Structural Roof Upgrades @ Peacock Hill Reservoir

What	Construction of a new reservoir roof and side walls at the Peacock Hill Reservoir.
When	Construction activity is anticipated to commence on September 10, 2018. Anticipate project completion by the end of August 2019. Working hours shall be 8:00AM to 5:00PM, Monday through Friday.
Where	Removal of the existing roof structure and installation of a new reservoir roof and side walls will be done within the Peacock Plant Site (1311 Peacock Hill Dr.) Access into and out of the site will be made from Peacock Hill Road.
What to Expect	Construction crews with backhoes, dump trucks, crew trucks and large construction equipment will be going in and out of the Plant Site. The streets will remain open to traffic during the construction period but traffic and parking may be restricted and access to driveways may be limited for short durations of time. The construction crews will make every effort to keep dust to a minimum. Please expect an increased level of noise during the construction period. Weekly activities such as trash pick-up will not be interrupted. After the roof and side walls are completed crews will disinfect the reservoir. This step is necessary to protect public health and to ensure compliance with the Waterworks Standards. Following the disinfection period, crews will flush the chlorinated water and any construction related sediment from the reservoir. Crews will dechlorinate the water before discharge. At the end of the project, crews will disassemble the temporary tanks that were constructed and placed in service during the first phase of construction. .
Contacts	If you have any questions or concerns about the construction activities for this project, please call the Golden State Water Company Customer Service Center at (800) 999-4033.

Golden State Water Company thanks you for your patience while we work to improve your water system.
